AGUSTIN BAUTISTA

Summary

My goal is to work on web applications that are meaningful and improve quality of life. Before web development, I started my own organic vegetable farm and sold produce to the greater Seattle area.

Employment

General Assembly
Teaching Assistant

Seattle, WA
Jan 2016 to Current

- Regular interaction with 15+ students, guiding instruction on various web development topics, debugging and communicating coding best practices.
- Provide assistance on several projects built in various languages and frameworks including express/node.js and ruby on rails

Ogilvy Financial | Ogilvy Public Relations
Senior Associate

Beijing and Singapore
Aug 2009 to Dec 2012

Supported communications and investor relations programs for various China-based US-listed companies ẃ account management, planning, strategy, and media outreach

Projects

Retrieval

An Express/Node.js web application built with AngularJS and MongoDB (MEAN stack) with full CRUD functionality. Active retrieval using tools like flashcards are beneficial to learning retention and improved understanding. Users can view and search existing flashcards on the app and new cards can be created and added to the database after signup.

Explor

A team project built as a concept app in one week, Explor is a travel app that provides a snapshot of a location - weather, restaurants, cultural sites and nightlife - based on a user's search. Explor was built with Ruby on Rails, incorporating several API calls.

Jumanji Farm Webstore

A basic e-commerce site for a small-scale organic farm. A RESTful web application built using Express.js. The site integrates Stripe's API and a login authentication option from Facebook.

Vegetable Challenge

A front-end vegetable quiz game using HTML, CSS, JavaScript and jQuery. This was my first project during my time at General Assembly, Seattle.

Volunteering

Cycling+1

May 2008 to Aug 2008

Co-organized and participated in a cycling event from southern China to Cambodia with the mission to raise money for Free the Children projects in China and Sierra Leone. The team's combined efforts raised over US$23,000, cycling over 2,000 miles through Yunnan, Vietnam, Laos and Cambodia.
